# News Release

## Lightspeed Aviation to Sponsor SAFE at Sun-n-Fun

**Burnet, TX**—(January 21, 2010) The Society of Aviation and Flight Educators (SAFE) announces the signing of a letter of understanding with Lightspeed Aviation, manufacturers of the award-winning Zulu headset. The collaboration is part of a Lightspeed/SAFE initiative to promote the growth of general aviation in three critical areas:

1. Growing the number of pilots
2. Growing pilots in safety and proficiency
3. Growing the application of aviation for those in need

Lightspeed is also donating a Zulu headset valued at \$850 to be given away by SAFE during Sun-n-Fun. The partnership, however, does not end there. The two organizations will explore the joint development and promotion of aviation safety as well as opportunities to provide value-added benefits for SAFE members. According to SAFE Chair Doug Stewart, "SAFE has mapped out an aggressive partnership campaign for 2010. We are ecstatic about this agreement and look forward to working with the people at Lightspeed during Sun-n-Fun and beyond."

Lightspeed Aviation was founded in 1996 to provide pilots with the best performing, most comfortable headsets on the market. SAFE is a member-driven organization that embraces all aviation educators. Visit Lightspeed Aviation during Sun-n-Fun at Booth #D-051; visit SAFE at Booth #E-6.
